

Exp No : 01 Establishing the GRC Hierarchy – Authority Documents & Policies

Aim:

To establish and verify a security policy in the Eramba GRC platform by configuring its basic details, lifecycle information, and policy content.

Procedure

1. Log in to the Eramba GRC dashboard.
2. Navigate to Control Catalog → Policies.
3. Open the Change Management Policy from the policy list.
4. Verify the policy name and description.
5. Check the assigned GRC Contact and Policy Reviewer Contact.
6. Verify the policy status, published date, and next review date.
7. Review the Policy Content section, including the document type and version.
8. Verify that the policy description/content correctly defines the requirements for controlled changes.
9. Capture a screenshot of the completed policy details as evidence.

OUTPUT:

Fig 1.1

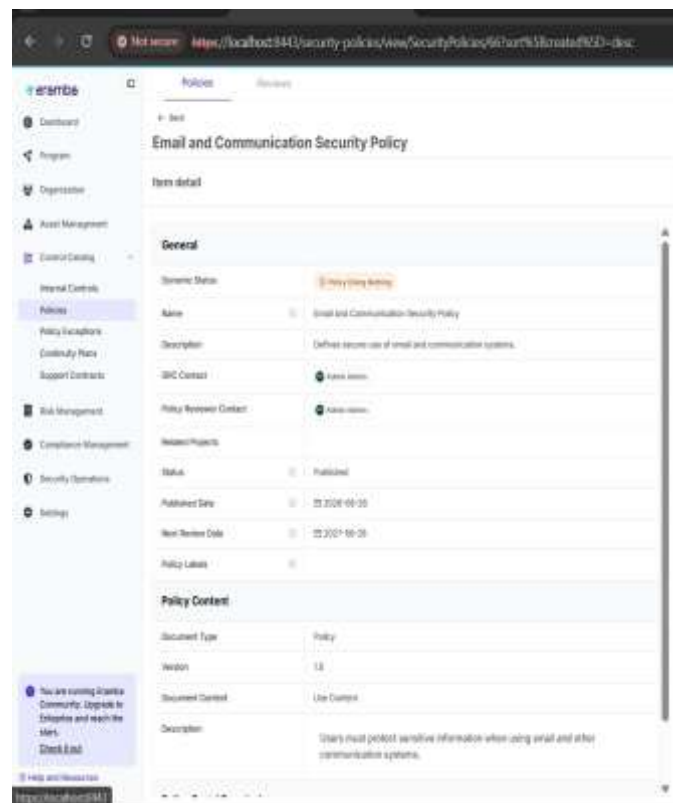

Fig 1.2

Result

The Change Management Policy was successfully configured and verified in Eramba. The policy details, assigned contacts, publication information, review date, version, and policy content were displayed correctly, confirming that the policy was successfully established within the GRC environment.
