

Exp No : 08 Configuring GRC / Risk Dashboards for Management Reporting

Aim

To review the Eramba dashboard and business risk register and use the displayed information for management-level monitoring of GRC tasks, risk scores, classifications, and treatments.

Procedure

1. Log in to Eramba and open Dashboard.
2. Review the available task summary sections on the dashboard.
3. Review the GRC information available for current management monitoring.
4. Navigate to Risk Management → Business Risks.
5. Review the configured business risk entries.
6. Verify the risk classification, numerical score, and treatment displayed for the risks.
7. Use the information as the basis for management reporting.
